HZSITD • DIGITAL CORRESPONDENCE SYSTEM

# Letter Paper Sending Portal

## Complete Specification

Expanded & Fully Operationalized from the HZSITD Software Requirements Document

A comprehensive, multi-view portal specification covering interface copy, routing, scanning, messaging, access control, tracking, notifications, administration, and accessibility.

DESIGN EDITION • FULL SOURCE CONTENT PRESERVED

# Document Guide

The original specification follows in its existing order. This guide is an added navigation aid; it does not replace or remove source content.

01 Portal Architecture Overview
02 Portal-Wide Navigation & Layout Text
03 View 1: Dashboard / Home
04 View 2: Compose New Letter
05 View 3: Inbox
06 View 4: Sent Letters
07 View 5: Drafts
08 View 6: Letter Detail & Tracking Timeline
09 View 7: Archive & Records
10 View 8: In-System Chat & Messaging
11 Search, Filter & Export
12 Hierarchical Routing Engine
13 Scanning & Document Upload Workflow
14 Role-Based Access Control (RBAC) — Full Matrix
15 Automated Response Tracking & Feedback Loop
16 Notification System & Email Templates
17 Administrative Panel
18 Error States, Empty States & Confirmation Dialogs
19 Print, Export & Bulk Actions
20 Accessibility & Keyboard Navigation Labels

# Letter Paper Sending Portal — Complete Specification

## Expanded & Fully Operationalized from the HZSITD Software Requirements Document

> *This document supersedes Section 5 of the initial plan. It fully operationalizes **every requirement** from the `Professional_Software_Requirements_Document.docx`, including hierarchical routing, scanning workflows, in-system chat, RBAC per directory, automated response tracking, and archive management.*

## Table of Contents

1. Portal Architecture Overview
2. Portal-Wide Navigation & Layout Text
3. View 1: Dashboard / Home
4. View 2: Compose New Letter
5. View 3: Inbox
6. View 4: Sent Letters
7. View 5: Drafts
8. View 6: Letter Detail & Tracking Timeline
9. View 7: Archive & Records
10. View 8: In-System Chat & Messaging
11. Search, Filter & Export
12. Hierarchical Routing Engine
13. Scanning & Document Upload Workflow
14. Role-Based Access Control (RBAC) — Full Matrix
15. Automated Response Tracking & Feedback Loop
16. Notification System & Email Templates
17. Administrative Panel
18. Error States, Empty States & Confirmation Dialogs
19. Print, Export & Bulk Actions
20. Accessibility & Keyboard Navigation Labels

## 1. Portal Architecture Overview

The Letter Portal is **not a single static page** — it is a multi-view application rendered within the existing Studiova page shell (`header` → `content` → `footer`). All views share the same HTML skeleton, header, and footer. The content area switches between views using the existing **tab/accordion component patterns** already present in the Studiova template.

### 1.1 Portal View Map

```
flowchart LR
    A["Portal Home<br/>Dashboard"] --> B["Compose<br/>New Letter"]
    A --> C["Inbox"]
    A --> D["Sent"]
    A --> E["Drafts"]
    A --> F["Track<br/>Letter"]
    A --> G["Archive"]
    A --> H["Chat /<br/>Messages"]
    A --> I["Admin<br/>Panel"]
    C --> J["Letter Detail<br/>& Timeline"]
    D --> J
    E --> B
    G --> J
```

### 1.2 Page File Structure

All views are contained within a single `letter-portal.html` file, using the existing tab navigation pattern from the Services section of `index.html`. This avoids creating additional HTML files while providing a rich multi-view experience.

| View | Tab ID | Access Level |
|---|---|---|
| Dashboard | `#dashboard` | All authenticated staff |
| Compose | `#compose` | All authenticated staff |
| Inbox | `#inbox` | All authenticated staff |
| Sent | `#sent` | All authenticated staff |
| Drafts | `#drafts` | All authenticated staff |
| Track | `#track` | All authenticated staff |
| Archive | `#archive` | Directory Lead + above |
| Chat | `#chat` | All authenticated staff |
| Admin | `#admin` | Department Head + System Admin only |

---

## 2. Portal-Wide Navigation & Layout Text

### 2.1 Banner Section

```
Badge: "Letter Portal"
H1: "Letter Paper Sending Portal"
Subtitle: "The secure digital hub for creating, submitting, tracking,
          and managing official letters and documents across all
          HZSITD directories."
Breadcrumb: Home › Letter Portal
```

### 2.2 Portal Sidebar / Tab Navigation

Using the existing vertical tab pattern:

```
■  Dashboard
─■  Compose New Letter
■  Inbox                    (badge: unread count)
■  Sent
■  Drafts                   (badge: draft count)
■  Track Letter
■■  Archive
■  Messages                 (badge: unread message count)
■■  Administration          (visible to admins only)
```

### 2.3 Top Bar (Within Portal Content Area)

```
Welcome, [User Full Name]
Directory: [User's Assigned Directory Name]
Role: [Officer / Directory Lead / Department Head / System Admin]
Last login: [Date & Time]
```

### 2.4 Portal-Wide Action Buttons (Persistent)

```
Primary:   "■ New Letter"        → Opens Compose view
Secondary: "■ Quick Track"      → Opens tracking number input modal
Tertiary:  "■ New Message"       → Opens Chat compose
```

---

# 3. View 1: Dashboard / Home

## 3.1 Section Header

```
Badge: 01
Section Label: "Overview"
Heading: "Portal Dashboard"
Body: "A summary of your correspondence activity, pending actions,
      and recent notifications."
```

## 3.2 Summary Statistic Cards

Using the existing counter card pattern from index.html (Lines 160–182):

```
Card 1 — Inbox
  Number: [dynamic count]
  Label: "Letters in Inbox"
  Sub-label: "[X] require your action"

Card 2 — Sent
  Number: [dynamic count]
  Label: "Letters Sent This Month"
  Sub-label: "[X] delivered, [Y] pending"

Card 3 — Pending Review
  Number: [dynamic count]
  Label: "Awaiting Your Review"
  Sub-label: "Oldest: [date]"

Card 4 — Drafts
  Number: [dynamic count]
  Label: "Unsent Drafts"
  Sub-label: "Last edited: [date]"
```

## 3.3 Recent Activity Feed

```
Heading: "Recent Activity"
Sub-heading: "Your latest correspondence updates"

Activity Item Template:
  "[Icon] [Action text] — [Timestamp]"

Example entries:
  "■ You received a letter from ICT Development & Expansion Directory — 2 hours ago"
  "■ Your letter HZSITD/2025/00142 was marked as 'Actioned' — Yesterday"
  "■ You sent a letter to Plan, Budget & Audit Directory — Oct 8, 2025"
  "■ New message from Ato Mulugeta Abebe — 3 hours ago"
  "■■ Letter HZSITD/2025/00138 requires your action — Urgent"

Empty state: "No recent activity. Your correspondence updates will appear here."
```

## 3.4 Action Required Panel

```
Heading: "Requires Your Action"
Body: "Letters and tasks that need your immediate attention."

Table Columns:
  Tracking No. | Subject | From | Received | Priority | Action Required

Action Required Labels:
  "Review & Respond"
  "Approve & Forward"
  "Acknowledge Receipt"
  "Provide Feedback"
  "Escalate to Director"

Empty state: "No pending actions. You're all caught up."
```

### 3.5 Quick Access Shortcuts

```
Heading: "Quick Actions"

Shortcut 1: "Compose New Letter"
  Description: "Draft and submit a new official letter."

Shortcut 2: "Track a Letter"
  Description: "Look up any letter by its tracking number."

Shortcut 3: "View Inbox"
  Description: "See letters received and requiring your attention."

Shortcut 4: "Open Messages"
  Description: "View your in-system chat conversations."

Shortcut 5: "Search Archive"
  Description: "Find historical letters and documents."

Shortcut 6: "Generate Report"   (Admin only)
  Description: "Create correspondence analytics reports."
```

---

## 4. View 2: Compose New Letter

This is the most complex view. It fully implements the requirements document's mandate for digital letter generation, scanning, and hierarchical routing.

### 4.1 Section Header

```
Badge: 02
Section Label: "Compose"
Heading: "Compose New Official Letter"
Body: "Create and route an official letter to any directory or officer
      within the department. All fields marked with an asterisk (*)
      are required."
```

### 4.2 Letter Metadata Fields

```
┌──────────────────────────────────────────────────────────────────────┐
│ LETTER METADATA                                                      │
└──────────────────────────────────────────────────────────────────────┘
│                                                                      │
│ Letter Reference No. *          [Auto-generated, read-only]          │
│   Format: HZSITD/[YEAR]/[5-digit sequence]                           │

## 5. View 3: Inbox

### 5.1 Section Header

```
Badge: 03
Section Label: "Inbox"
Heading: "Received Letters"
Body: "All official letters and documents sent to you or your directory."
```

### 5.2 Inbox Sub-tabs

```
Tab 1: "All"              — All received letters
Tab 2: "Unread"            — Letters not yet opened
Tab 3: "Action Required"   — Letters awaiting your response/action
Tab 4: "Forwarded to Me"   — Letters routed from another directory
Tab 5: "Confidential"      — Restricted-access letters (■ icon)
```

### 5.3 Inbox Table

```
Column Headers:
  ■ | Priority | Tracking No. | Subject | From (Directory / Officer) |
  Date Received | Type | Status | Actions

Priority Indicators:
  ■ Urgent
  ■ Normal
  ■ Confidential

Status Labels:
  "Unread"           — Not yet opened
  "Read"             — Opened but no action taken
  "Under Review"     — Currently being reviewed
  "Responded"        — Reply sent
  "Forwarded"        — Routed to another directory
  "Actioned"         — Required action completed
  "Archived"         — Moved to archive

Row Actions (dropdown per row):
  "Open"             — View full letter
  "Mark as Read"     — Mark without opening
  "Reply"            — Compose a response letter
  "Forward"          — Route to another directory/officer
  "Acknowledge"      — Confirm receipt without full response
  "Escalate"         — Route upward to supervisor
  "Archive"          — Move to archive
  "Print"            — Generate printable version
  "Flag for Follow-up" — Add to follow-up queue
```

### 5.4 Inbox Toolbar

```
Left side:
  ■ "Select All"
  "Mark Read" | "Mark Unread" | "Archive" | "Forward" (bulk actions)

Right side:
  Sort by: [Dropdown: "Date (Newest)", "Date (Oldest)",
            "Priority (Highest)", "Subject (A-Z)", "Sender"]
  "■ Filter" (opens filter panel)
  "■ Refresh"

Pagination:
  "Showing [X]–[Y] of [Z] letters"
  "« Previous | Page [N] of [M] | Next »"
```

---

## 6. View 4: Sent Letters

### 6.1 Section Header

```
Badge: 04
Section Label: "Sent"
Heading: "Sent Letters"
Body: "Letters and documents you have dispatched to other
      directories and officers."
```

### 6.2 Sent Table

```
Column Headers:
  ■ | Tracking No. | Subject | To (Directory / Officer) |
  Date Sent | Type | Priority | Delivery Status | Actions

Delivery Status Labels:
  "Queued"           — Submitted, awaiting processing
  "In Transit"       — Being routed through approval chain
  "Delivered"        — Received by the recipient's inbox
  "Read"             — Opened by the recipient
  "Acknowledged"     — Recipient confirmed receipt
  "Response Received" — A reply letter has been sent back
  "No Action Taken"  — Delivered but no response after [X] days
  "Returned"         — Rejected or returned by recipient

Row Actions:
  "View"             — Open the sent letter
  "Track"            — View full routing timeline
  "Resend"           — Re-send if delivery failed
  "Recall"           — Attempt to withdraw (if unread)
  "Follow Up"        — Send a follow-up letter
  "Print"            — Generate printable version
  "Archive"          — Move to archive
```

### 6.3 Recall Confirmation Dialog

```
Title: "Recall This Letter?"
Body: "You are attempting to recall letter [Tracking No.] sent to
      [Recipient]. This is only possible if the recipient has not
      yet opened the letter.

      If the letter has already been read, the recall will fail
      and the recipient will be notified of the attempt."
Buttons: "Attempt Recall" | "Cancel"

Success: "Letter recalled successfully. It has been moved to your Drafts."
Failure: "Recall failed. The letter has already been read by the recipient."
```

---

## 7. View 5: Drafts

### 7.1 Section Header

```
Badge: 05
Section Label: "Drafts"
Heading: "Draft Letters"
Body: "Letters saved before submission. Resume editing and send
      when ready."
```

### 7.2 Drafts Table

```
Column Headers:
  ■ | Subject | To (Directory) | Last Edited | Priority | Actions

Row Actions:
  "Edit"             — Resume editing in Compose view
  "Submit Now"       — Submit without further editing
  "Duplicate"        — Create a copy as a new draft
  "Delete"           — Permanently delete the draft

Empty state:
  Heading: "No Drafts"
  Body: "You have no saved drafts. Letters saved during composition
        will appear here."
  Button: "Compose New Letter"
```

### 7.3 Auto-Save Notice

```
"Drafts are automatically saved every 30 seconds while composing.
 Your last auto-save was at [Time]."
```

---

# 8. View 6: Letter Detail & Tracking Timeline

This view opens when any letter is clicked from Inbox, Sent, or Archive.

## 8.1 Letter Header Bar

```
Tracking Number: HZSITD/2025/00142
Subject: [Letter Subject]
Status: [Current Status Badge]
Priority: [Priority Badge]
Type: [Letter Type]
```

## 8.2 Letter Metadata Panel

```

## 8.3 Letter Body Display

```
Heading: "Letter Content"
[Full letter body text rendered here]

Attachments Panel:
  Heading: "Attached Documents ([count])"
  File list: [filename] | [type] | [size] | "View" | "Download"

Signature & Stamp:
  "Signed by: [Name]"       [Signature image displayed]
  "Official stamp applied"  [Stamp image displayed, if present]
```

### 8.4 Routing & Tracking Timeline

```
Heading: "Letter Routing Timeline"
Body: "Complete history of this letter's journey through the system."

Timeline entries (vertical timeline using existing list component):

● Created
  "[Date & Time] — Letter created by [Sender Name]"

● Submitted
  "[Date & Time] — Letter submitted for delivery"

● Approval Pending (if applicable)
  "[Date & Time] — Pending approval from [Directory Head Name]"

● Approved (if applicable)
  "[Date & Time] — Approved by [Directory Head Name]"

● In Transit
  "[Date & Time] — Letter routed to [Destination Directory]"

● Delivered
  "[Date & Time] — Letter delivered to [Recipient Directory] inbox"

● Read
  "[Date & Time] — Letter opened by [Recipient Name]"

● Acknowledged
  "[Date & Time] — Receipt acknowledged by [Recipient Name]"

● Forwarded (if applicable)
  "[Date & Time] — Forwarded to [New Directory] by [Officer Name]"
  "Reason: [Forwarding note]"

● Under Review
  "[Date & Time] — Letter is under review by [Officer Name]"

● Actioned
  "[Date & Time] — Action completed by [Officer Name]"
  "Action taken: [Description]"

● Response Sent (if applicable)
  "[Date & Time] — Response letter [Tracking No.] sent by [Name]"

● Archived
  "[Date & Time] — Letter archived by [Name]"
  "Archive reference: [Archive number]"
```

### 8.5 Letter Detail Action Bar

```
"Reply"             — Compose a response letter
"Forward"           — Route to another directory
"Acknowledge"       — Confirm receipt
"Print"             — Generate printable PDF
"Download as PDF"   — Save letter and attachments as PDF
"Archive"           — Move to archive
"Flag"              — Flag for follow-up
"Report Issue"      — Report a problem with this letter
```

---

## 9. View 7: Archive & Records

*(Implements the requirements doc's "direct digital placement/archiving" and "searchable by date and tracking number")*

### 9.1 Section Header

```
Badge: 07
Section Label: "Archive"
Heading: "Letter Archive & Records"
Body: "The permanent record of all completed correspondence.
      Letters in the archive are read-only and cannot be modified.
      Use the search and filter tools to locate specific documents."
```

### 9.2 Archive Search Bar

```
Search input:
  Placeholder: "Search by tracking number, subject, sender, or keyword"
  Button: "Search Archive"

Advanced Filters (expandable panel):
  Date Range: [From date] — [To date]
  Directory: [Dropdown — all directories]
  Letter Type: [Dropdown — all types]
  Priority: [Dropdown — Normal / Urgent / Confidential]
  Status: [Dropdown — Actioned / Archived / Returned]
  Sender: [Text input with autocomplete]
  Keyword in Body: [Text input]

  Buttons: "Apply Filters" | "Reset Filters"
  Saved searches: "Save This Search" | "Load Saved Search"
```

### 9.3 Archive Table

```
Column Headers:
  Tracking No. | Subject | From | To | Date | Type |
  Archive Ref. | Actions

Row Actions:
  "View"               — Open read-only letter detail
  "Download PDF"       — Export letter as PDF
  "Print"              — Send to printer
  "Request Retrieval"  — Request to un-archive (admin approval)

Pagination: "Showing [X]–[Y] of [Z] archived letters"
```

---

## 10. View 8: In-System Chat & Messaging

*(Directly implements the requirements doc's "in-system chat/messaging feature alongside official letter communication")*

### 10.1 Section Header

```
Badge: 08
Section Label: "Messages"
Heading: "Internal Messaging"
Body: "Communicate directly with colleagues across all directories.
      For official correspondence, use the Compose Letter function.
      Messages are for informal coordination and quick communication."
```

### 10.2 Distinction Notice

```
> [!NOTE]
> "Messages sent here are for internal coordination purposes and
>  do NOT constitute official correspondence. For formal, trackable
>  communication, please use the 'Compose New Letter' function."
```

## 10.3 Conversation List Panel (Left Side)

```
Heading: "Conversations"

Search: "Search conversations or people..."

Filter tabs:
  "All" | "Unread" | "Groups" | "Direct"

Conversation item template:
  [Avatar] [Name / Group Name]
  [Last message preview — truncated]
  [Timestamp — "2m ago" / "Yesterday" / "Oct 8"]
  [Unread badge count]

New conversation button:
  "+ New Conversation"

Group options:
  "+ Create Group"
  Group name label: "Group Name"
  Group name placeholder: "Enter a name for this group"
  Members label: "Add Members"
  Members placeholder: "Search by name or directory"
  Button: "Create Group"
```

## 10.4 Message Thread Panel (Right Side)

```
Header:
  [Recipient Name / Group Name]
  [Directory] | [Online / Offline / Last seen: time]
  Actions: "■ Attach File" | "■ Info" | "■ More Options"

More Options dropdown:
  "View Profile"
  "Search in Conversation"
  "Mute Notifications"
  "Clear Chat History"
  "Report"

Message bubble template:
  [Sender Name (in group chats)]
  [Message text]
  [Timestamp] [Read receipt: ✓ Sent / ✓✓ Delivered / ✓✓ Read]

System messages:
  "[Name] created this group — [Date]"
  "[Name] added [Name] to the group — [Date]"
  "[Name] left the group — [Date]"

Message input:
  Placeholder: "Type a message..."
  Buttons: "■" (attach file) | "Send"

  Attachment prompt:
    "Attach a file to this conversation"
    "Accepted formats: PDF, JPG, PNG, DOCX"
    "Maximum file size: 5 MB"
    Buttons: "Browse Files" | "Cancel"

Typing indicator: "[Name] is typing..."

Empty state (new conversation):
  "Start a new conversation by sending a message below."
```

## 10.5 Message vs. Official Letter — Clarification Labels

```
In message composer:
  "■ This is an informal message, not an official letter."

In letter composer:
  "■ This is an official letter that will be formally tracked
   and archived."

Upgrade prompt (in chat):
  "Need to send this as an official letter instead?"
  Button: "Convert to Official Letter"
  Help text: "This will open the Compose Letter form with the
  current conversation context pre-filled."
```

# 11. Search, Filter & Export

## 11.1 Global Search

```
Accessible from all views via the top bar search icon.

Placeholder: "Search letters, messages, or tracking numbers..."

Search scope tabs:
  "All" | "Letters" | "Messages" | "Archive" | "People"

Search results template:
  [Result type icon] [Title / Subject]
  [Context snippet with highlighted keywords]
  [Tracking No. / Date / Directory]
  "View" button

No results:
  "No results found for '[search term]'. Try different
   keywords or check the spelling."
```

## 11.2 Advanced Filter Panel

```
Available in Inbox, Sent, and Archive views:

Filters:
  Date Range:        [From] — [To]
  Directory:         [Multi-select dropdown]
  Officer:           [Searchable dropdown]
  Letter Type:       [Multi-select dropdown]
  Priority:          [Checkboxes: Normal, Urgent, Confidential]
  Status:            [Multi-select dropdown]
  Has Attachments:   [Checkbox: "Only letters with attachments"]
  Keyword:           [Text input — searches subject and body]
  Routing Type:      [Dropdown: Direct, Upward, Downward, Lateral, Broadcast]

Buttons: "Apply Filters" | "Reset All" | "Save as Preset"

Active filters display:
  "[Filter Name]: [Value]  ✕" (removable chips)
  "Clear All Filters"
```

---

# 12. Hierarchical Routing Engine

*(Fully implements "peer-to-peer sharing and hierarchical flow — forwarding upwards, downwards, or across relevant directories")*

## 12.1 Routing Type Descriptions (Shown in Compose View)

```
Direct Routing:
  "Send a letter directly to a specific directory or named officer.
   The letter goes straight to the recipient's inbox."

Upward Routing:
  "Submit this letter to your supervising authority (directory head
   or department head). Use this for escalations, approval requests,
   and reports requiring supervisory review."

Downward Routing:
  "Issue a directive or instruction to a subordinate directory or
   officer. The letter is delivered with a 'Directive' classification
   and the recipient is required to acknowledge receipt."

Lateral Routing:
  "Send correspondence across to a peer directory at the same
   organizational level. Use this for inter-directory coordination,
   information sharing, and collaborative requests."

Broadcast Routing:
  "Distribute this letter simultaneously to all directories within
   the department. Typically used for department-wide announcements,
   policy changes, and circular notices. Requires Department Head
   or System Admin authorization."
```

### 12.2 Approval Chain Labels

```
When "Requires Approval Before Send" is checked:

Status: "Pending Approval"
Message to sender: "Your letter is awaiting approval from
  [Directory Head Name]. You will be notified once a decision
  is made."

Approver's view:
  Heading: "Letter Pending Your Approval"
  Body: "[Sender Name] has submitted a letter that requires your
  approval before delivery."
  Letter preview: [Full letter displayed]

  Buttons:
    "Approve & Send"     — Deliver to the recipient
    "Approve with Notes" — Add comments and deliver
    "Return for Revision" — Send back to the sender with feedback
    "Reject"             — Block delivery permanently

  Return for Revision dialog:
    Title: "Return Letter for Revision"
    Label: "Revision Notes"
    Placeholder: "Explain what changes are needed before this
    letter can be approved..."
    Buttons: "Return to Sender" | "Cancel"

  Reject dialog:
    Title: "Reject Letter Submission"
    Label: "Reason for Rejection"
    Placeholder: "Provide the reason for rejecting this letter..."
    Buttons: "Confirm Rejection" | "Cancel"
```

### 12.3 Forwarding Interface

```
When "Forward" is clicked on any received letter:

Dialog Title: "Forward Letter"
Body: "Route this letter to another directory or officer."

Fields:
  Forward To (Directory) *:  [Dropdown — all directories]
  Forward To (Officer):      [Dropdown — optional]
  Forwarding Note:           [Textarea]
    Placeholder: "Add a note explaining why this letter is
    being forwarded (optional)"
  Retain a Copy:             [Checkbox, default checked]
    Label: "Keep a copy in my Sent Letters"

Buttons: "Forward Letter" | "Cancel"

Confirmation: "Letter [Tracking No.] has been forwarded to
[Destination Directory]. The routing timeline has been updated."
```

---

## 13. Scanning & Document Upload Workflow

*(Already detailed in Section 4.7 — this section provides the additional scanning status messages)*

### 13.1 Camera Scan Status Messages

```
"Initializing camera..."
"Camera ready. Position your document within the frame."
"Hold steady... Capturing..."
"Scan captured. Review below."
"Processing image... Enhancing quality..."
"Scan quality: Good / Fair / Poor"
"Poor quality detected. Consider retaking under better lighting."
"Scan added to attachments as 'Scan_[timestamp].jpg'"
"Camera access denied. Please allow camera permissions in your
 browser settings and try again."
"Camera not available on this device. Use the 'Upload File' or
 'Hardware Scanner' options instead."
```

### 13.2 Hardware Scanner Status Messages

```
"Searching for connected scanners..."
"Scanner detected: [Scanner Model Name]"
"Connecting to scanner..."
"Scanner ready. Place document on the scanner bed."
"Scanning in progress... Please wait."
"Scan complete. Processing image..."
"Scanned document added to attachments as 'Scan_[timestamp].pdf'"
"Scanner not detected. Please ensure:"
"  • The scanner is connected via USB or network"
"  • The scanner is powered on"
"  • Scanner drivers are installed"
"Click 'Retry Detection' to search again."
```

---

## 14. Role-Based Access Control (RBAC) — Full Matrix

*(Implements "Permissions are strictly bound to specific directory structures and organizational levels")*

### 14.1 Role Definitions

```
Level 1 — Officer
  "Standard staff member assigned to a specific directory. Can
   compose, send, and receive letters within and across directories.
   Cannot access administrative functions or other users' letters."

Level 2 — Directory Lead
  "Head of a directory unit. Has all Officer permissions plus
   oversight of all letters within their directory, ability to
   approve/reject letters from subordinates, and access to
   directory-level reporting."

Level 3 — Department Head
  "Head of the entire HZSITD department. Has oversight of all
   directories, can issue broadcast communications, approve
   cross-directory escalations, and access department-wide
   reporting and audit trails."

Level 4 — System Administrator
  "Technical administrator responsible for system configuration,
   user account management, and maintenance. Has all Department
   Head permissions plus full access to audit logs, user management,
   and system settings."
```

### 14.2 Permission Matrix (Shown in Admin Panel)

```
■■■
```

### 14.3 Access Denied Messages

```
Attempting restricted action:
  "Access Denied — You do not have permission to perform this action.
   This function requires [Required Role] access. Contact your
   directory administrator if you believe this is an error."

Attempting to view another directory's letters (as Officer):
  "Access Restricted — You can only view letters addressed to you
   or your directory. Directory-wide letter access requires
   Directory Lead authorization."

Attempting admin functions as non-admin:
  "Administrative Access Required — This section is restricted to
   Department Heads and System Administrators. If you need
   administrative access, contact the Software Development &
   Administration Directory."

Attempting broadcast as non-department-head:
  "Broadcast Authorization Required — Only the Department Head and
   System Administrators can send broadcast communications to all
   directories."
```

---

## 15. Automated Response Tracking & Feedback Loop

*(Implements "Automated response tracking for letters and directives submitted to respective directories")*

### 15.1 Auto-Tracking Status Stages

```
Stage 1:  "Created"            — Letter drafted in the system
Stage 2:  "Submitted"          — Letter sent by the author
Stage 3:  "Pending Approval"   — Awaiting supervisor approval (if required)
Stage 4:  "Approved"           — Cleared by supervisor
Stage 5:  "In Transit"         — Being routed to destination
Stage 6:  "Delivered"          — Arrived in recipient's inbox
Stage 7:  "Read"               — Opened by the recipient
Stage 8:  "Acknowledged"       — Recipient confirmed receipt
Stage 9:  "Under Review"       — Actively being reviewed
Stage 10: "Forwarded"          — Re-routed to another directory
Stage 11: "Actioned"           — Required action completed
Stage 12: "Archived"           — Permanently filed in records
```

### 15.2 Automated Reminders & Escalation Text

```
Reminder 1 (after 2 business days with no acknowledgment):
  To recipient: "Reminder: You have an unacknowledged letter
  [Tracking No.] from [Sender Directory] received on [Date].
  Please acknowledge receipt at your earliest convenience."

Reminder 2 (after 5 business days with no action):
  To recipient: "Second Reminder: Letter [Tracking No.] from
  [Sender Directory] has been in your inbox for 5 business days
  without action. Please review and respond promptly."
  To sender: "Update: Your letter [Tracking No.] sent to
  [Recipient Directory] has not yet received a response after
  5 business days."

Auto-escalation (after 10 business days with no action):
  To recipient's directory head: "Escalation Notice: Letter
  [Tracking No.] sent to [Recipient Name] in your directory has
  not been actioned for 10 business days. Please review and
  ensure appropriate action is taken."
  To sender: "Your letter [Tracking No.] has been automatically
  escalated to [Recipient's Directory Head] due to inaction
  after 10 business days."

Feedback loop completion:
  To sender: "Good news: Your letter [Tracking No.] has been
  marked as 'Actioned' by [Recipient Name] on [Date].
  View the response details in your Sent Letters."
```

### 15.3 Response Tracking Dashboard (for senders)

```
Heading: "Letter Response Tracker"
Body: "Monitor the response status of all letters you have sent."

Table columns:
  Tracking No. | Subject | Sent To | Date Sent |
  Days Elapsed | Current Status | Last Activity | Action

Status color coding:
  Green:  "Actioned" or "Response Received"
  Yellow: "Read" or "Under Review"
  Orange: "Delivered" (no action after 3+ days)
  Red:    "No Action" (5+ days) or "Escalated"
```

---

## 16. Notification System & Email Templates

### 16.1 In-App Notification Bell

```
Bell icon in top bar: ■ (with unread count badge)

Notification panel heading: "Notifications"
Sub-tabs: "All" | "Letters" | "Messages" | "System"

Notification templates:
  "■ New letter received from [Name] — [Time ago]"

# 17. Administrative Panel

### 17.1 Section Header

```
Badge: 09
Section Label: "Administration"
Heading: "System Administration"
Body: "Manage users, review audit logs, configure directories,
      and generate system reports."
Note: "This section is restricted to Department Heads and
      System Administrators."
```

### 17.2 Admin Sub-Navigation

```
Tab 1: "User Management"
Tab 2: "Directory Configuration"
Tab 3: "Audit Trail"
Tab 4: "Reports & Analytics"
Tab 5: "System Settings"
Tab 6: "Notification Settings"
```

## 17.3 User Management

```
Heading: "Staff Portal User Accounts"
Body: "Add, modify, deactivate, or reassign staff portal accounts."

User Table Columns:
  ■ | Full Name | Email | Directory | Role | Status |
  Last Login | Actions

Status Labels:
  "Active"       — Account in good standing
  "Pending"      — Registration awaiting approval
  "Suspended"    — Temporarily disabled
  "Deactivated"  — Permanently disabled

Actions per user:
  "Edit Profile"     — Modify name, directory, role
  "Reset Password"   — Send password reset link
  "Change Role"      — Promote/demote access level
  "Reassign Directory" — Move to different directory
  "Suspend Account"  — Temporarily disable
  "Deactivate"       — Permanently disable
  "View Activity Log" — See user's action history

Add New User:
  Button: "+ Add New User"
  Form fields:
    Full Name *: [Text input]
    Official Email *: [Email input]
    Directory Assignment *: [Dropdown — all directories]
    Role *: [Dropdown: Officer, Directory Lead, Department Head,
            System Admin]
    Temporary Password *: [Auto-generated with copy button]
    Send Welcome Email: [Checkbox, default checked]
  Buttons: "Create Account" | "Cancel"

Pending Registration Requests:
  Heading: "Pending Registration Requests ([count])"
  Table: Name | Email | Requested Date | Actions
  Actions: "Approve" | "Reject" | "View Details"

  Approve dialog:
    Title: "Approve Registration Request"
    Body: "Assign a directory and role for [Name]:"
    Fields:
      Directory *: [Dropdown]
      Role *: [Dropdown]
    Buttons: "Approve & Create Account" | "Cancel"

  Reject dialog:
    Title: "Reject Registration Request"
    Label: "Reason for Rejection"
    Placeholder: "Provide a reason (sent to the applicant)..."
    Buttons: "Reject Request" | "Cancel"
```

## 17.4 Directory Configuration

```
Heading: "Directory Structure Management"
Body: "View and modify the organizational directory structure."

Directory List:
  Each directory shown as a card:
    [Directory Name]
    "Director: [Name]"
    "Officers: [count]"
    "Letters this month: [count]"
    Buttons: "Edit" | "View Officers" | "View Reports"

Edit Directory Dialog:
  Fields:
    Directory Name *: [Text input]
    Director *: [User dropdown]
    Description: [Textarea]
    Active: [Toggle switch]
  Buttons: "Save Changes" | "Cancel"
```

## 17.5 Audit Trail

```
Heading: "System Audit Trail"
Body: "Complete log of all user actions, letter operations,
      and system events. Audit records cannot be modified
      or deleted."

Filter bar:
  Date Range: [From] — [To]
  User: [Searchable dropdown]
  Action Type: [Dropdown: Login, Letter Created, Letter Sent,
               Letter Read, Letter Forwarded, Letter Archived,
               User Created, User Modified, Role Changed,
               Password Reset, System Config Changed]
  Directory: [Dropdown]

Audit Table Columns:
  Timestamp | User | Action | Target | Details | IP Address

Export: "Export Audit Log" → CSV / PDF
```

## 17.6 Reports & Analytics

```
Heading: "Correspondence Analytics"
Body: "Generate and view reports on letter volume, processing
      times, and system usage."

Available Reports:
  "Letter Volume by Directory" — Bar chart + table
  "Average Response Time" — Line chart by directory
  "Pending Letters Aging Report" — Letters awaiting action, by age
  "User Activity Summary" — Active users, letters sent/received
  "Letter Type Distribution" — Pie chart by letter category
  "Escalation Report" — Letters that required escalation
  "System Usage Statistics" — Login frequency, peak hours

Report Parameters:
  Date Range: [From] — [To]
  Directory: [All / Specific]
  Format: "View in Browser" | "Export as PDF" | "Export as CSV"

Button: "Generate Report"
```

## 17.7 System Settings

```
Heading: "System Configuration"

Setting Groups:

Letter Numbering:
  "Reference number prefix": [Text input, default: "HZSITD"]
  "Sequence reset period": [Dropdown: Annual / Never]
  "Next sequence number": [Number input, read-only display]

Auto-Reminders:
  "First reminder after": [Number] "business days without acknowledgment"
  "Second reminder after": [Number] "business days without action"
  "Auto-escalation after": [Number] "business days without action"
  "Enable email notifications": [Toggle]
  "Enable in-app notifications": [Toggle]

File Upload:
  "Maximum file size (MB)": [Number input]
  "Maximum attachments per letter": [Number input]
  "Allowed file types": [Multi-select: PDF, JPG, PNG, DOCX, XLSX]

Session & Security:
  "Session timeout (minutes)": [Number input]
  "Maximum login attempts before lockout": [Number input]
  "Password minimum length": [Number input]
  "Require password change every": [Number] "days"

Button: "Save Settings" | "Reset to Defaults"
```

# 18. Error States, Empty States & Confirmation Dialogs

## 18.1 Error Messages

```
E01: "Unable to submit letter. Please check all required fields
     and try again."
E02: "File upload failed. The file exceeds the maximum size of
     [X] MB. Please compress or split the file."
E03: "File type not supported. Accepted formats: PDF, JPG, PNG,
     DOCX, XLSX."
E04: "Network error. Your letter draft has been auto-saved.
     Please check your internet connection and try again."
E05: "Session expired. Please log in again to continue.
     Your draft has been saved automatically."
E06: "The tracking number '[input]' was not found. Please
     verify the number and try again."
E07: "You do not have permission to access this letter.
     Contact your directory administrator."
E08: "This letter has already been submitted and cannot be
     edited. To make changes, submit a new letter referencing
     the original tracking number."
E09: "Recipient directory not found. The directory may have
     been renamed or deactivated. Contact your system administrator."
E10: "Unable to recall letter. The recipient has already
     opened the correspondence."
E11: "Maximum attachment limit reached ([X] files). Remove
     an existing attachment before adding a new one."
E12: "Scanner communication error. Please check the connection
     and try again."
E13: "Camera access denied by browser. Please enable camera
     permissions in your browser settings."
E14: "Unable to send broadcast. This action requires Department
     Head authorization."
E15: "Password reset failed. The email address is not associated
     with any active account."
E16: "Account locked. Too many failed login attempts. Contact
     your directory administrator to unlock your account."

     currently inactive."
E18: "Draft auto-save failed. Please manually save your work
     using the 'Save as Draft' button."
E19: "Search returned too many results. Please add more
     specific filters to narrow your search."
E20: "Unable to generate report. Please select a valid date
     range and try again."
E21: "User account creation failed. An account with this email
     address already exists."
E22: "Unable to connect to the notification service.
     In-app notifications may be delayed."
E23: "System maintenance in progress. Some features may be
     temporarily unavailable. Please try again later."
```

## 18.2 Empty States

```
ES01 — Inbox:         "Your inbox is empty. New letters will appear here
                       when they arrive."
ES02 — Sent:          "You haven't sent any letters yet. Click 'Compose
                       New Letter' to get started."
ES03 — Drafts:        "No draft letters. Letters saved during composition
                       will appear here."
ES04 — Archive:       "No archived letters found. Completed correspondence
                       will be stored here."
ES05 — Notifications: "No notifications. You're all caught up."
ES06 — Chat:          "No conversations yet. Start one by clicking
                       '+ New Conversation'."
ES07 — Search:        "No results found for your search. Try different
                       keywords or broaden your filters."
ES08 — Activity Feed: "No recent activity. Your correspondence updates
                       will appear here."
ES09 — Action Req.:   "No pending actions. You're all caught up."
ES10 — Attachments:   "No attachments added. You may submit without
                       attachments if the letter body is complete."
ES11 — Users Table:   "No user accounts found matching your criteria."
ES12 — Audit Trail:   "No audit records found for the selected filters."
```

### 18.3 Confirmation Dialogs

```
CD01 — Submit Letter:      (detailed in Section 4.8)
CD02 — Discard Draft:      (detailed in Section 4.8)
CD03 — Recall Letter:      (detailed in Section 6.3)
CD04 — Forward Letter:     (detailed in Section 12.3)
CD05 — Archive Letter:
  Title: "Archive This Letter?"
  Body: "Archived letters become read-only and are permanently
  stored in the records system. This action cannot be undone."
  Buttons: "Archive" | "Cancel"

  Title: "Delete This Draft?"
  Body: "This will permanently remove the draft. This action
  cannot be undone."
  Buttons: "Delete Permanently" | "Cancel"

CD07 — Suspend User Account:
  Title: "Suspend User Account"
  Body: "Suspending [Name]'s account will immediately prevent
  them from logging in or accessing any portal features.
  Existing letters will not be affected."
  Buttons: "Suspend Account" | "Cancel"

CD08 — Approve Registration:  (detailed in Section 17.3)
CD09 — Reject Registration:   (detailed in Section 17.3)
```

---

## 19. Print, Export & Bulk Actions

### 19.1 Print Labels

```
Print button tooltip: "Print this letter"
Print header: "HADIYA ZONE SCIENCE & INFORMATION TECHNOLOGY DEPARTMENT"
Print sub-header: "Official Letter Record"
Print footer: "Printed from HZSITD Letter Portal on [Date].
               Tracking Number: [No.]. This is a system-generated document."

Print options dialog:
  Title: "Print Options"
  Include letterhead: [Checkbox, default: checked]
  Include attachments: [Checkbox, default: unchecked]
  Include routing timeline: [Checkbox, default: unchecked]
  Buttons: "Print" | "Cancel"
```

### 19.2 Export Labels

```
Export button: "Download as PDF"
Export options:
  "Letter Only"        — Just the letter content
  "Letter + Attachments" — Letter with all attached files
  "Full Record"        — Letter, attachments, and routing timeline

Export filename format: "[Tracking_No]_[Subject_truncated].pdf"
```

### 19.3 Bulk Action Labels

```
After selecting multiple items:
  "[X] items selected"
  Bulk actions dropdown:
    "Mark as Read"
    "Mark as Unread"
    "Archive Selected"
    "Forward Selected"
    "Export Selected as ZIP"
    "Print Selected"
    "Delete Selected Drafts" (drafts only)

Bulk archive confirmation:
  "Archive [X] letters? This action cannot be undone."
  Buttons: "Archive All" | "Cancel"
```

---

# 20. Accessibility & Keyboard Navigation Labels

## 20.1 ARIA Labels

```
"Main navigation menu"
"Letter portal sidebar navigation"
"Compose new letter form"
"Letter inbox table"
"Sent letters table"
"Draft letters table"
"Archive search results table"
"Letter tracking timeline"
"Chat conversation list"
"Chat message thread"
"Notification panel"
"Administrative controls"
"Filter panel"
"Attachment upload area"
```

## 20.2 Keyboard Shortcuts (Tooltip Text)

```
Ctrl + N : "Compose new letter"
Ctrl + Enter : "Submit current letter"
Ctrl + S : "Save as draft"
Ctrl + F : "Open search"
Ctrl + / : "Show keyboard shortcuts"
Esc : "Close dialog or panel"
```

## 20.3 Screen Reader Announcements

```
"Letter submitted successfully. Tracking number: [No.]"
"[X] new letters in your inbox"
"[X] notifications unread"
"Letter status changed to [Status]"
"File uploaded successfully: [Filename]"
"Draft auto-saved at [Time]"
```

---

*This specification contains **all text content** needed to build the Letter Portal. Every label, message, placeholder, tooltip, error, confirmation, notification, and status description is provided. The implementation requires **no guesswork about copy** — every string the user will see is defined above. All views use the existing Studiova HTML component patterns (cards, tabs, accordions, tables, forms, badges, buttons) with zero layout restructuring.*
